

Thank you for looking at my dogs! My name is Brenda Williams. I am from Camp Point, Illinois where I own 15 acres in the country so I have plenty of room for my dogs to grow and flourish. In my time, I have raised Labrador Retrievers as well as Border Collies (Nipper & Smitty on the Tannin home page belong to me) and now Great Danes! I love the security a large breed brings to the home, however it is the nature and loving heart of this breed that has inspired me to share the love!! As you can see as you look thru our pictures, our dogs are all a part of our families. Most days you can find Maggie lounging on "her" (or anybody's) couch or at my feet under my desk at work. She is always welcoming to any of the many rescues we take in including a litter of kittens she took upon herself to raise!

I spent the night "in the box" with her while she was in labor and helped with the birth of each one of these babies. They will be raised in my home until they can be moved outside which I don't expect to do until some time in May. They will still be handled and socialized on a daily basis....who could refuse??? My puppies have already had their dewclaws removed and will be wormed and have their shots at the appropriate times. Each puppy will also come with a health guarantee.

Maggie normally weighs in about 135 while Thor is about 155. Thor stands 35" at the shoulder and has a 43" chest and a 24" neck. This litter of pups are all strong & healthy with the exception of our little miracle we call Hope. She is catching up though.... They say, dynamite comes in small packages! All of the puppies have white tips on the tail and all or some white on all their feet.

I will be taking pick of this litter which I know will be a female. My decision will not be final until the puppies are 4 - 6 weeks old. However I am currently accepting deposits on all.

Shipping of these pups can be arranged via air or I am always willing to take a road trip and meet you half way!

Enjoy looking at my dogs and again, I thank you!
